

SET - A

Que 1 :

Write C program to check given number is Disarium Number or not.

Definition:

A number is a Disarium number if the sum of the digits powered with their respective positions is equal to the number itself.

For example:

Sample input : 89

Sample output : 89 is a Disarium number.

Explanation : $89 \rightarrow 8^1 + 9^2 = 89$

Sample input : 175

Sample output :

Explanation : $175 \rightarrow 1^1 + 7^2 + 5^3 = 175$

Sample input : 45

Sample output : 45 is NOT a Disarium number

Explanation : $45 \rightarrow 4^1 + 5^2 = 29$

.....

Que 2 :

Write a C program to given pattern.

```
1
3 2 1
5 4 3 2 1
7 6 5 4 3 2 1
9 8 7 6 5 4 3 2 1
```

.....

Que 3 :

Write C program to print given pattern.

```
* * * * *
* *       * *
*   *   *   *
*       *       *
*   *   *   *
* *       * *
* * * * *
```

.....

Que 4 :

Write a C program to delete a given element from an array.

Sample input :

Enter the number of elements in the array: 8

Enter 8 elements : 10 20 30 30 30 40 50 30

Enter the element to be deleted: 30

Sample output :

Array after deletion: 10 20 40 50

.....

Que 5 :

Write a C program to print all the prime numbers from an array.

Sample input :

Enter the number of elements in the array: 7

Enter 7 elements: 12 5 9 7 11 2 8

Sample output :

Prime numbers in the array: 5 7 11 2

.....

End
